

20235 North Cave Creek Road #104483 Phoenix, Arizona 85024
602-909-5058 www.skelleyhouse.org

Because of the structure of our program, we are unable to accommodate clients with a dual diagnosis of alcoholism and/or addiction coupled with a severe mental disorder. Residents requiring treatment with benzodiazepines, major anti-psychotic medications, and medications with a **high risk of abuse** will not be accepted at Skelley House. We do accept residents taking most forms of anti-depressants, and certain psychotropic drugs if the mental disorders are minor. Residents are **not accepted** who require long term pain management with narcotic or habit forming medications. The following is a list of **most** medications which are included:

Abilify	Geodon	Quetiapine
Adderall	Halcion	Restoril
Alprazolam	Haldol	Risperdal
Ambien	Haloperidol	Risperidone
